

**Veteran-led software, data, AI, and cybersecurity engineering for federal health and civilian missions.**

## DIFFERENTIATORS

- High-performing teams, stood up in a fraction of the time
- Senior operators who lead from the front, invested in your mission
- Healthcare domain exposure across the leadership team
- CISSP-certified — security-first engineering & risk advisory
- One team for the full stack: software, data, cloud, AI, and cybersecurity
- Developing AI since 2012 — well before the GenAI wave

## CAPABILITIES

### Software Engineering & Legacy Modernization

New systems, app development, and legacy modernization — scalable, performant front-end and back-end applications in Python, C/C++, and full-stack web.

### Data Engineering & Big Data

Postgres, MongoDB, Hadoop, and Apache Spark. Pipelines, large-scale processing, migration, and analytics that turn data into real-time insight.

### Cloud & Infrastructure

Secure cloud and on-premise infrastructure with deep Kubernetes experience for enterprise-scale health and mission systems.

### AI, Machine Learning & RAG

Developing AI since 2012, long before the GenAI wave. Advanced ML and retrieval-augmented generation (RAG) for automation, analytics, and intelligent decision-making.

### Cybersecurity & Risk

Security-first engineering and CISSP-backed risk advisory, including quantitative cyber risk (FAIR) that supports NIST RMF and risk-based decisions with defensible reporting for agency leadership.

## LEADERSHIP

### Anthony Toreson

*Founder & CEO · Software Engineering*

U.S. Army veteran and software engineer with 20+ years building and modernizing scalable, mission-critical systems. Former Army Military Intelligence systems integrator; Master of Computer Science (MCS) and MBA from Rice University.

### Michael Meis

*Chief Information Officer · Cybersecurity*

U.S. Army veteran and IT and cybersecurity leader with nearly two decades leading digital transformation, security, and technology operations across healthcare, financial services, and government. MBA and M.S. in Cyber Security & Information Assurance, Western Governors University.

**Let's talk about your mission.**
